DETAILED ACTION

Page 2

Response to Amendment

1. The amendment filed on November 14, 2005 has been entered. It is noted, however, that

the correction to claim 1 was apparently not included in the amendment as asserted by the

applicant.

Drawings

2. The replacement drawings were received on November 14, 2005. These drawings are

accepted by the examiner.

Election/Restrictions

3. Applicant's election without traverse of species F (Figures 30-39) in the reply filed on

November 14, 2005 is acknowledged.

4. Claims 2-10 are therefore withdrawn from further consideration pursuant to 37 CFR

1.142(b) as being drawn to nonelected species. Election was made without traverse in the reply

filed on November 14, 2005.

Specification

5. The disclosure is objected to because of the following informalities: (A) The phrase "at

th" on the first line of page 40 should apparently be changed to --at the--. (B) The phrase "f the"

Application/Control Number: 10/767,456 Page 3

Art Unit: 1724

on the second line of page 44 should apparently be changed to -- of the--. Appropriate correction

is required.

Claim Objections

6. Claims 1, 16, and 17 are objected to because of the following informalities: (A) The

word "pip" on the second line of claim 1 should apparently be changed to --pipe--. (B) The word

"engin" on the first line of claim 16 should apparently be changed to --engine--. (C) The word --

the-- should apparently be inserted between "to" and "annular" on the second line of claim 17.

Appropriate correction is required.

Claim Rejections - 35 USC § 102

7. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the

basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on

sale in this country, more than one year prior to the date of application for patent in the United States.

8. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent No.

1,562,651 to Mock. Note Mock's carburetor in Figure 1 with intake pipe 11, throttle valve 16,

annular venturi tube 23, and fuel discharging portion 24 for producing atomization of the fuel

(note page 1, lines 98-107).

Application/Control Number: 10/767,456 Page 4

Art Unit: 1724

9. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent No.

1,443,343 to Chandler. Note Chandler's carburetor in Figure 1 with intake pipe 3, throttle valve

12, annular venturi tube 14, and fuel discharging portion 7 for producing atomization of the fuel

(note page 3, lines 88-97).

10. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent No.

4,308,835 to Abbey. Note Abbey's carburetor in Figure 1 with intake pipe 22, throttle valve 12,

annular venturi tube 26, and fuel discharging portion 25 for producing atomization of the fuel

(note col. 7, lines 12-17).

Allowable Subject Matter

11. Claims 11-20 are objected to as being dependent upon a rejected base claim, but would

be allowable if rewritten in independent form including all of the limitations of the base claim

and any intervening claims.

12. As allowable subject matter has been indicated, applicant's reply must either comply with

all formal requirements or specifically traverse each requirement not complied with. See 37

CFR 1.111(b) and MPEP § 707.07(a).

13. The following is a statement of reasons for the indication of allowable subject matter:

The prior art fails to teach or fairly suggest the recited carburetor with the recited intake pipe,

Application/Control Number: 10/767,456 Page 5

Art Unit: 1724

throttle valve, annular venturi tube, annular center venturi tube, inside and outside air passages, and fuel discharging portions in the recited positioning and operative relationship.

Conclusion

14. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. These references have been cited as art of interest to show other carburetors.

15. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Richard L. Chiesa whose telephone number is (571) 272-1154.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Duane S. Smith, can be reached at (571) 272-1166.

Any inquiry of a general nature or relating to the status of this application should be directed to the Technology Center 1700 receptionist whose telephone number is (571) 272-1700.

Facsimile correspondence must be transmitted through (571) 273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
